

Food Recalls

Affected **6x more** units in the third quarter compared to the previous quarter...

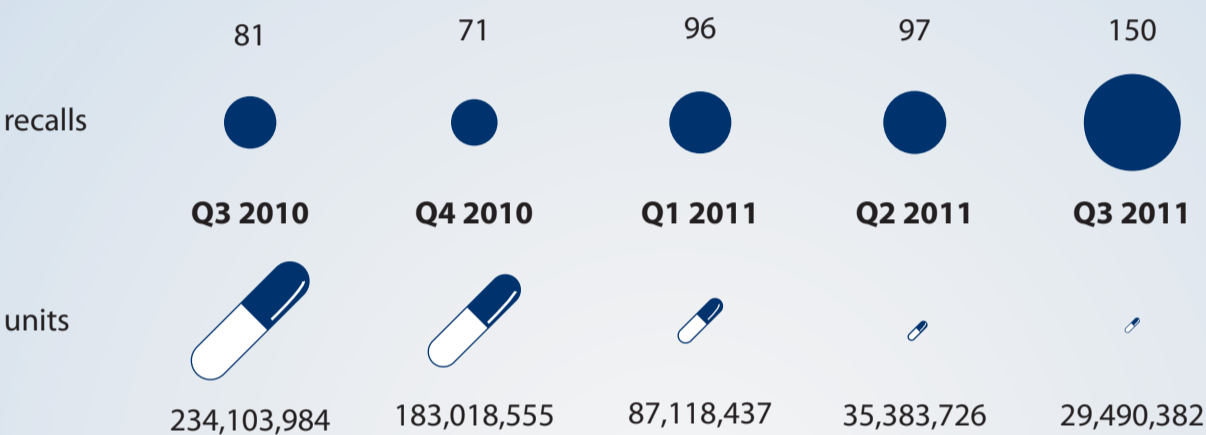

with undeclared allergens the leading cause, representing **more than 50%** of FDA food recalls.

Pharmaceutical Recalls

Continued to **increase** in the third quarter...

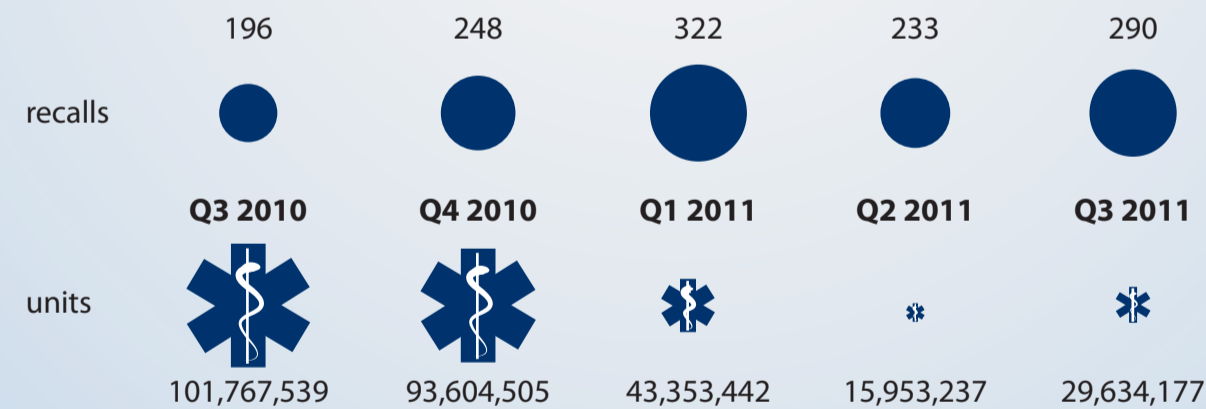

but affected **16% fewer** units than the previous quarter.

Medical Device Recalls

Affected **nearly 2X** the number of units compared to the second quarter...

and showed a modest increase in recalls compared to the average number of recalls in the prior two quarters.

Consumer Product Recalls

Hit a **5-quarter low**...

with children's and infant products making up less than **25%** of all recalls by the CPSC.
